

Swing Sets

100% CEDAR

Creating Childhood Memories Since 1992!

Reasons Why Eastern Jungle Gym® is *THE BEST!*

Since 1992, Eastern Jungle Gym® has been providing safe, high quality and affordable swing sets that last for years. Our variety of models, unmatched craftsmanship and great value has earned us the confidence of thousands of customers.

- 1:** All construction is **100% Cedar** (C. laniolata). Because cedar is naturally resistant to rot and insect damage, no chemical treatment is necessary to preserve the wood (unlike other woods).
- 2:** **All Wood** is sanded, and edges and corners are rounded. Each piece is then factory stained before installation. This ensures a safe and long-lasting finish.
- 3:** Huge **4" x 6" and 4" x 4" Laminated Cedar Construction**, plus our Easy 1-2-3 **Steel Bracket System**, means you never rely on any single bolt or fastener alone. All our load-bearing points are double supported.
- 4:** **Heavy Duty Swing Hangers**—Our heavy-duty swing hangers are the safest and strongest. Made of steel and cast iron mounted with thru-bolts.

- 5:** We use **Lag Bolt & Wood Screw Fasteners**—never nails or staples! Lag bolts do not need re-tightening like carriage bolts or other through-bolt fasteners, so there's no need for annual maintenance or service.
- 6:** **Recessed Hardware** means that all bolts are countersunk for a safe and aesthetically-pleasing look. No caps! Exposed bolts can create a hazard for loose clothing to catch on.
- 7:** Straight coil **Swing Chain** is heated, primed, and **Plastisol-Coated** for a safe, smooth grip. No ropes or powder-coated chain!
- 8:** **Steel Ladder Rungs**—unmatched in strength and safety.
- 9:** **Wood step ladder rungs** for easier access—6-inch wide steps for sure footing.
- 10:** **Heavy Duty Slides**—sturdy wave slides with high side rails, and scoop slides with double-wall construction.

Easy 1-2-3
Steel A-Frame
Bracket System

ENGINEERED HEAVY-DUTY CONSTRUCTION

All swing beams and side supports are supported with **Easy 1-2-3 A-Frame Brackets**. Designed specifically for swing sets, these brackets are the strongest and safest support system on the market today! *Never rely on fasteners alone to support your swing set.*

Straight-Base Series

The Straight Base Series features a straight vertical clubhouse structure which can accommodate these options: built in picnic table, bottom clubhouse, or deluxe sand box.

**Our Original Design
Now Better Than Ever!**

Main photo features customized Dream® with wood roof, green wave slide, and monkey bars.

Built-in Picnic Table

The **Straight-Base Series** offers lots of activity and options, and these swing sets are a great choice if your property is sloped or uneven. There is no need to spend money on costly site preparation and landscaping services, as these swing sets use our unique leveling system. Our original and most popular design, these play sets offer the most activities beneath the play deck such as the built in picnic table or a fully enclosed bottom clubhouse.

Available in 5'½' and 6' deck heights with 8'½' and 9'½' swing beam heights.

Creating Childhood Memories Since 1992!

Angled-Base Series

FUN For the Entire Family!

Using a unique A-frame design support system, these models can accommodate a 3-chain tire swing below the deck, saving space while providing another great swinging activity!

Main photo features customized Extreme® with wood roof, 12' green wave slide, and gang plank.

With the wide stance of the **Angled-Base Series**, a tire swing is the perfect accessory to go beneath the play deck — adding more fun without taking up any additional property! These wooden swing sets are very popular among families looking for a tire swing, an activity that accommodates up to three kids. The property needs to be somewhat level for these wood play sets, but a slight incline will still work. These models, with wider bases, are especially appealing to adventurous children who love to climb and explore!

Available in 5 1/2' and 6 1/2' deck heights with 8 1/2' and 9 1/2' swing beam heights.

Creating Childhood Memories Since 1992!

Multi-Deck Series

These Swing Sets Have It ALL!

If you are looking for a bigger model with lots of options, these backyard swing sets have it all. The Multi-Deck Series jungle gyms feature a straight vertical structure, with multiple play decks. Bottom playhouses, built-in picnic tables and sandboxes are all options.

Built-in Picnic Table

Bottom Playhouse

The **Multi-Deck Series** is where you see all of our model designs combined, with lots of options and available accessories. These models feature straight vertical posts, and, like our standard straight-base series models, can accommodate a picnic table, bottom playhouse or sandbox below the clubhouse. Choose from multiple play decks. With a range from two to five play decks, there's a swing set to fill every size backyard! With our multi-deck series swings sets the possibilities for outdoor fun are endless! Our largest line of wooden swing sets, these also work best on somewhat level ground.

Available in 5 1/2' and 7' deck heights with a swing beam height of 8 1/2'.

EASTERN JUNGLE GYM® SWING SETS Can Be Installed Almost *Anywhere!*

There's no need for costly site preparation...

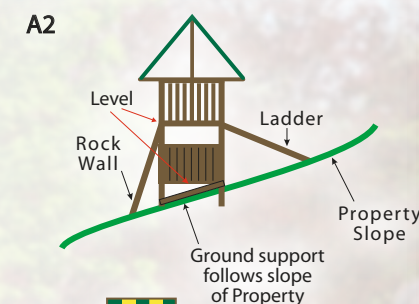

Our exclusive leveling system was developed through more than 27 years of installation experience. This unique, time-proven leveling system ensures safe installation on un-level properties.*

* Eastern Jungle Gym models with an A-frame design do require a level area for installation.

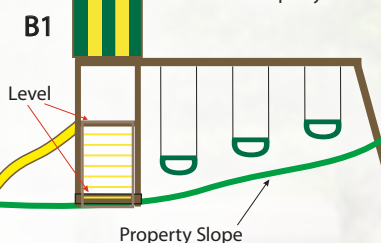

A1

A2

B1

B2

While your jungle gym will be level and safe, some of the activities will be affected by the sloping property (notice Rock Wall vs. Ladder in Diagrams A1 and A2). For example, if your slide is facing downhill (or uphill), it will be at a steeper angle (or more shallow angle) than normal; therefore it will be faster (or slower) (Diagrams B1 and B2). If your swing beam is installed downhill (or uphill), the swing position closest to the end will be lower to (or further from) the ground (Diagrams B1 and B2).

To determine play area size, it is recommended that you add six feet to the jungle gym dimension on all sides. However, beside swing beam side supports and other low traffic areas, it is not critical to have a six foot "play" area. Installing a resilient surfacing under the jungle gym is always recommended, and can be done AFTER your jungle gym is installed.

Questions AND ANSWERS

Q. What kind of wood does Eastern Jungle Gym® use?

A. Eastern Jungle Gym® uses only **100% Cedar** (C. laniolata).

Q. Is there any chemical treatment used to preserve the wood?

A. NO! Cedar is **naturally resistant** to rot and insect damage.

Q. How much maintenance is required for the Jungle Gym?

A. All Eastern Jungle Gyms® are **pre-stained** from the factory. However, we do recommend future applications be applied to maintain the wood's natural beauty.

Q. Are surface cracks and checking in the wood normal?

A. Yes! It is a natural characteristic of any outdoor wood product and will not affect the structural integrity of the jungle gym.

Q. How much weight will the Jungle Gym support?

A. Eastern Jungle Gyms® can support as many children (and adults) as you can fit on them!

Q. What if we move after our jungle gym is installed?

A. All Eastern Jungle Gyms® are **movable**. They can be disassembled and then reassembled at your new home. (Ask your rep for details).

Q. My yard is not level. Can I still install an Eastern Jungle Gym®?

A. Yes! We have a **unique leveling system** which enables us to customize our jungle gyms to accommodate most property conditions. (Our angled base sets do require a level area.)

Q. Will the slide get hot from the sun?

A. All slides and accessories are made with **U.V. Protectors** which help to inhibit the absorption of the sun's heat and also help to prevent the color from fading. However, darker-colored slides will retain more heat.

Q. How are your Jungle Gyms anchored?

A. All Eastern Jungle Gyms utilize a **unique ground support system** which distributes weight evenly to ensure strength and stability. Stakes are provided for the side supports as an added precaution.

Q. Are Eastern Jungle Gyms expandable?

A. Yes! All models can be customized and added onto after installation so they grow with your family.

Q. Can I get Monkey Bars with swings on them?

A. No. The Consumer Product Safety Commission and ASTM no longer allow swing sets be designed with swings attached to monkey bars. (ASTM F1148)

Q. How can I find out more about Eastern Jungle Gym®?

...How do I order one?

A. Call your **local representative**, who will be happy to answer any questions you may have, and to assist you in placing your order. Visit our web site at www.easternjunglegym.com for a location nearest you.

10-Year & 1-Year **Warranty**

For a pro-rated period of **TEN YEARS** from the date of purchase, Eastern Jungle Gym® warrants to the original purchaser all wooden components against structural failure due to insect infestation or wood rot. Seasonal checks, minor cracking, knots, knot holes, peeling and warping are considered a natural characteristic of wooden components and do not result in structural failure and are not covered under this warranty. Any components that are returned to Eastern Jungle Gym® under this limited ten year warranty will be replaced or repaired at our option. Any cost associated with work that must be performed on site is not covered. All travel and labor expenses or shipping and handling expenses, if any, will be the responsibility of the original purchaser. The warranty described in this paragraph is the original purchaser's sole and exclusive remedy and lasts for ten years or until original customer sells or otherwise transfers the unit.

All warranties are subject to proper installation and normal residential use. Eastern Jungle Gym® warrants to original purchaser that, for a period of **ONE YEAR** from date of purchase, and subject to the limitations stated below, all chains, rope, tent tops, seats, hardware, metal braces, handles, rungs and all accessories will be free from defects in material and workmanship. Cracks in plastic components are not considered defects in workmanship or material if they do not affect the functionality of component or jungle gym. Any components that are returned to Eastern Jungle Gym® under this limited one year warranty will be replaced or repaired at our option. Any cost associated with work that must be performed on site is not covered. All travel and labor expenses or shipping and handling expenses, if any, will be the responsibility of the original purchaser. The warranty described in this paragraph is the original purchaser's sole and exclusive remedy and lasts for one year or until original customer sells or otherwise transfer the unit.

Non-residential use of swing set is prohibited and will have no warranty as the swing sets are designed for residential use **ONLY**.

Eastern Jungle Gym® reserves the right to examine photographs and/or physical evidence of merchandise claimed to be defective and to recover merchandise prior to any warranty claims. All merchandise returned for inspection must be sent freight pre-paid unless return authorization number is issued. This warranty does not apply to any swing set 1) subjected to abuse, vandalism, improper installation, negligence or acts of God. 2) Any alterations, additions, or relocation of the swing set by the customer or third party voids warranty. Failure to maintain your equipment properly—including, without limitation and by way of example only, not staining the unit or not checking and tightening the hardware—may cause the warranties described herein not to apply in certain circumstances.

This warranty is expressly in lieu of all other warranties; it excludes all consequential damages. Some states do not allow the limitation or exclusion of consequential damages, so the above may not apply to you. Eastern Jungle Gym® does not authorize any person or representative to express or imply any other warranty.

NOTICE: The wooden components in your Eastern Jungle Gym® will have imperfections. We would like to remind you that seasonal checking, surface cracks, knots, and knot holes are natural characteristics of all wooden swing sets. These imperfections that are not resulting in structural failure are NOT covered under this warranty.

Creating Childhood Memories Since 1992!

Independent Dealer:

About Us

AND OUR MISSION

From our humble beginning back in 1992 as a family venture in a small shed with two employees, to our current facility with over 30,000 square feet, we've maintained one core philosophy—***Build a safe, strong set that will last for years and sell it at a reasonable price.***

It's been over 28 years, and we're still family owned and operated, but now we have lots of help! Over the years, we've developed new designs to keep up with the ever-changing demands. We've also pioneered engineering feats, including our Easy 1-2-3 steel bracket system and laminated cedar construction—both exclusive to Eastern Jungle Gym.

With over 28 years of ***Creating Childhood Memories*** we strive to build a safe, strong and high quality swing set that will last for years. We are committed to maintaining the highest standards of value, service and integrity.

Today it's more important than ever to keep your children healthy and happy. There's no better way than to get them outside playing! We thank you for considering an Eastern Jungle Gym swing set and hope that we can help your family start *creating their own childhood memories!*
